Antibus Scales & Systems, Inc.  
Cabel Antibus  
1919 Research Drive  
Fort Wayne IN 46808

Dear Cabel,

We appreciate your continued dedication to ISO 17025 and the laboratory community. Laboratory Accreditation Bureau is granting an extension of your accreditation that was originally granted through **May 11, 2017**. This letter serves as an extension of your ISO 17025 Accreditation. The new granted through date is now **October 11, 2017**. The Certificate and the Scope of Accreditation of your locations **L2253 & L2253.01** will remain valid until the new granted through date or new certificates and scopes are issued. If within this extension period your company decides to discontinue or cancel your accreditation, your accreditation will immediately be terminated and your listing discontinued as an accredited laboratory.

The current information as described above will be modified within two business days on the directory at [www.l-a-b.com](http://www.l-a-b.com). It is L-A-B's policy not to modify the scope or certificate related to extensions of accreditation.

We look forward to a long and continued successful business relationship with your company. We appreciate your dedication to continuous improvement for our laboratory community.

Kind Regards,

R. Douglas Leonard Jr.  
Vice President, ANSI-ASQ National Accreditation Board d/b/a
