**RE: ANTIBUS SCALES & SYSTEMS COMPLIANCE TO ISO 9000 QUALITY STANDARD**

Antibus Scales and Systems is a distributor, installer, servicer and calibrator of weighing systems and a variety of other test equipment and reference standards. We do not manufacture product and instead provide product to our customers through our OEMs.

As such, we are accredited to ISO/IEC 17025:2017 through ANAB, who is recognized by and is a signatory of the International Laboratory Accreditation Cooperation (ILAC). This accreditation provides our customers confidence in our test and calibration results. As cited in ISO/IEC 17025:2017, Introduction (page vi), "Laboratories that conform to this document will also operate generally in accordance with the principles of ISO 9001."

To provide additional assurance of our compliance with ISO 9001:2015, and of our product and service quality, we maintain a QMS fully compliant with ISO 9001:2015 and full system audits to ISO 9001:2015 are performed annually by a sub-contracted Lead Assessor who is certified to perform assessments to ISO 9001 and other quality systems standards.

Sincerely,

Cabel Antibus
